Table of Contents

- About this Documentation
 - Stability Index
 - JSON Output
 - Syscalls and man pages
- Synopsis
- Addons
 - Hello world
 - Building
 - Linking to Node.js' own dependencies
 - Loading Addons using require()
 - Native Abstractions for Node.js
 - Addon examples
 - Function arguments
 - Callbacks
 - Object factory
 - Function factory
 - Wrapping C++ objects
 - Factory of wrapped objects
 - Passing wrapped objects around
 - AtExit hooks
 - void AtExit(callback, args)
- Assert
 - assert(value[, message])
 - assert.deepEqual(actual, expected[, message])
 - assert.deepStrictEqual(actual, expected[, message])
 - assert.doesNotThrow(block[, error][, message])
 - assert.equal(actual, expected[, message])
